

Overview on Maritime Casualty Investigation

Objective

This is an introductory course aimed at providing participants with the knowledge and practical appreciation of safety, and the application of marine casualty investigation findings into good ship operation practices.

Who Should Attend

Suitable for all junior and senior operational executives in a shipping company, it is especially relevant for technical staff like superintendents, management trainees and executives. Top management executives who wish to have a clear understanding of the importance of safety culture in ship operations would find this course extremely helpful.

Course Outline

- Introduction to why marine casualty investigation is necessary
- Types of marine casualty investigations and who are they for
- Getting started in carrying out a marine investigation assignment
- What to look for in conducting a marine casualty investigation case
- Basic analysis method
- Getting the best from the findings of marine casualty investigation
- Marine casualty case studies

Methodology

The course will be highly interactive and based on practical experiences. Besides lecture notes, there would be case studies as well as group discussions.
